Education

Bachelor in Computer Engineering   Comsats University Islamabad
2020 - 2024

Relevant Coursework: Data Structures and Algorithms, Design and Analysis of Algorithms, Network Security, Digital Image Processing, Operating Systems, Computer Architecture, Embedded Systems

Personal Profile

As a software engineer, I have a strong foundation in software development and system architecture. My expertise is in finding creative solutions for complex technical challenges. I am deeply committed to staying updated on emerging technologies, aiming to advance the field while prioritizing excellent performance and user experience

Work Experience

Career Crafters   July 2023 - February 2024
Web Manager

- Website Development and Maintenance: Responsible for overseeing the development, design, and maintenance of Career Crafters' website.
- Manage and update website content regularly, including blog posts, articles, event announcements, and resources.

CodeClause   June 2023 - July 2023

Artificial Intelligence Intern

- Assisted in designing and implementing algorithms for machine learning and artificial intelligence applications using Python, TensorFlow, and PyTorch.
- Participated in data collection, cleaning, and preprocessing tasks to prepare datasets for training and testing machine learning models, utilizing Pandas, NumPy, and Scikit-learn.

Core competencies

- **Web Scraping:** Python
- **Programming Languages**: Python, Java, C, C++, HTML and CSS, MERN
- **Databases:** such as MySQL, and SQL
- **Hardware Simulation**: MATLAB, LT spice, Mars, and Cisco Packet Tracer

Certifications

- Coding For Everyone: C and C++ - Coursera
- Python Data Structures - Coursera
